Sunday, May 21, 2023: 1:00 – 7:30pm

CONFERENCE OBJECTIVES

This mini-conference connects healthcare researchers and practitioners to actively discuss *ways to build and advance our healthcare operations management community*. This helps all of us develop innovative, practical and sustainable solutions that improve the operations of healthcare organizations. The conference provides a venue for discussion between those working and researching healthcare delivery issues to share what works, what doesn't and why, and which areas need greater attention. The conference is meant to complement the POMS annual meeting (May 21-26, 2023) as it gives participants a chance to learn from practitioners and researchers and allows time for brainstorming new research ideas and approaches to improving the effectiveness of healthcare systems.

PANEL DISCUSSION: RESEARCH AND EDUCATIONAL PROGRAMS

The panel discussion will focus on research and educational programs in collaboration with healthcare systems. Programs discussed will include undergraduate, masters, and doctoral programs.

Wiljeana Glover, Stephen C. and Carmella R. Kletjian Foundation Distinguished Professor of Global Healthcare Entrepreneurship, Associate Professor of Operations Management, and Founding Faculty Director of the KMH Center for Health Innovation and Entrepreneurship at Babson College

Craig Froehle, Professor of Operations, Business Analytics and Information Systems in the Carl H. Lindner College of Business and Faculty in the Department of Emergency Medicine in the College of Medicine at the University of Cincinnati

Xin (David) Ding, Assistant Professor of Supply Chain Management and Academic Director for the Healthcare Analytics and Intelligence master program at Rutgers Business School

Vikram Tiwari, Associate Professor of Management in the Owen Graduate School of Management at Vanderbilt University, Associate Professor of Anesthesiology and Biomedical Informatics in the School of Medicine, and Director of Surgical Business Analytics at the Vanderbilt University Medical Center

RESEARCH IN THE ROUGH

The session is designed to provide researchers with constructive feedback on their research projects that are in progress, ranging from early stage conceptualization to later stage manuscript preparation. During the session, each selected applicant will summarize the main ideas of the project including what they are looking for out of the discussion (feedback on next steps, a collaborator, etc.). Examples of applicants could include (but are not limited to) a doctoral student asking for external feedback on their dissertation or a faculty member seeking a collaborator on a new idea.

SYNAPSE:

Applied Healthcare Operations Management & Research Conference

Sunday, May 21, 2023: 1:00 – 7:30pm
at

Hyatt Regency, Orlando, FL
Production & Operations Management
Society Conference Hotel

Organized By
