

ETLP

Easton Technology Leadership Program

Comprehensive technical leadership concentration that equips graduates with the leadership preparedness, management knowledge and entrepreneurial disposition to succeed in diverse technical settings - from small start-ups to larger global technology corporations.

- Established in 2008 with a gift from James Easton.
- Aims to strengthen leadership skills of people with engineering and technology backgrounds and interests to help them “move up” to become business leaders or “move out” to become entrepreneurs.
- Faculty involved include from the Decisions, Operations and Technology Management area which has been ranked #2 among US business schools in citation impact.

“I think you have a great set of students, and a great program running.

- Easton Speaker

“I am applying for the ETLP because I feel it was the fastest and best way for me to obtain the business background necessary for management roles in the engineering field that I had not obtained yet through my work experience.

- Easton Student

“I see the Easton program as an add-on to my previous experiences and a stepping stone towards a solid foundation and a path to leadership in a technology field.

- Easton Student

“An enjoyable and inspiring experience for us to see incredibly talented students and the mentoring Easton [...] is doing in preparation for their transition to new business management and entrepreneurial opportunities

- Easton Speaker
